

ARIGALA BALAJI

Cybersecurity Analyst | Cloud Security | Vulnerability Assessment

Bengaluru, India • arigalabalaji8331@gmail.com • +91-6305157607 • LinkedIn: linkedin.com/in/arigala-balaji-45b2a8279

PROFESSIONAL SUMMARY

Cybersecurity-focused IT professional with a B.Tech in Cyber Security and active experience administering enterprise cloud environments (Azure, AWS, GCP, OCI). Strong foundation in identity security, endpoint protection, vulnerability assessment, and security automation. Hands-on practitioner via TryHackMe (SOC Level 1, Web Hacking, Incident Response paths) and PortSwigger Web Security Academy (OWASP Top 10 exploitation techniques). Experienced in Microsoft Entra ID conditional access, Intune endpoint compliance, and Azure security posture management. Aspiring cybersecurity professional targeting roles in vulnerability management, cloud security, penetration testing, and security analysis.

WORK EXPERIENCE

Associate System Administrator (Security-Focused) | GISUL Software Solutions

Bengaluru, India | Apr 2026 – Present

- Administer identity and access security across Microsoft Entra ID, enforcing MFA policies, Conditional Access, and RBAC least-privilege principles for 100+ users.
- Configure and manage Microsoft Intune endpoint compliance policies, mobile device management (MDM), and Windows Defender endpoint security for cloud-joined devices.
- Manage cloud security posture across Azure, AWS, GCP, and OCI; review IAM roles, monitor for misconfigurations, and apply security baselines.
- Perform vulnerability analysis on Docker Swarm containerized workloads and Apache Guacamole remote desktop infrastructure; remediate configuration weaknesses.
- Implement infrastructure security hardening using PowerShell automation — patch compliance, CIS baseline enforcement, and stale account remediation.
- Monitor and investigate security events in Azure Log Analytics and Azure Monitor; correlate activity logs to detect anomalous access patterns.
- Conduct access reviews and privilege cleanup across Azure subscriptions; enforce separation of duties and remove unnecessary permissions post-training cycle.
- Automate secret rotation, credential hygiene, and security policy enforcement via PowerShell and Bash scripts in CI/CD and VM provisioning workflows.

IT Administrator Intern (Security Orientation) | GISUL Software Solutions

Bengaluru, India | Jan 2026 – Apr 2026

- Supported AWS IAM security audits — reviewing overpermissive roles, unused access keys, and non-compliant policies using AWS CLI and IAM Access Analyzer.
- Contributed to Lambda-based automated security remediation: deprovisioning idle resources and enforcing tagging policies via EventBridge triggers.
- Assisted in Google Workspace security administration — audit log review, 2-Step Verification enforcement, and OAuth app access management.
- Documented security incidents, change management records, and infrastructure configurations in line with security best practices.

EDUCATION

B.Tech – Computer Science & Engineering (Cyber Security)

Kalasalingam University, Tirupati, India | Graduated: 2025

TECHNICAL SKILLS

Security Tools: Microsoft Defender for Cloud, Azure Sentinel (SIEM awareness), Wazuh, Wireshark, Burp Suite (awareness), OWASP ZAP

Cloud Security: Azure IAM/RBAC, AWS IAM + Access Analyzer, GCP IAM, OCI IAM, Cloud Security Posture Management

Identity Security: Microsoft Entra ID, Conditional Access, MFA, Privileged Identity Management (PIM) awareness, OAuth 2.0

Endpoint Security: Microsoft Intune, MDM/MAM, Windows Defender ATP, Endpoint Compliance Policies

Vulnerability Assessment: TryHackMe (SOC L1, Web Hacking, Privilege Escalation), PortSwigger Web Security Academy, CVE analysis

Web Application Security: OWASP Top 10, SQL Injection, XSS, CSRF, Broken Authentication, IDOR

OS & Networking: Windows Server 2019/2022, Ubuntu/Kali Linux, TCP/IP, DNS, DHCP, Firewalls, VPN, Network Forensics

Scripting & Automation: PowerShell, Bash, Python, Azure CLI — security automation and incident response scripts

Frameworks & Standards: OWASP Top 10, NIST Cybersecurity Framework, ISO 27001 (awareness), MITRE ATT&CK (awareness)

Containers & Infrastructure: Docker, Docker Swarm, HAProxy, Apache Guacamole, PostgreSQL

CERTIFICATIONS & PRACTICAL TRAINING

- HackerRank – SQL (Advanced) Certification
- HackerRank – Python (Basic) Certification
- TryHackMe – Active Practitioner | Completed: SOC Level 1 Path, Pre-Security Path, Web Fundamentals, Metasploit, Privilege Escalation modules
- PortSwigger Web Security Academy – Completed labs: SQL Injection, Cross-Site Scripting (XSS), CSRF, Authentication Bypass, Business Logic Vulnerabilities
- Pursuing: CompTIA Security+ | CEH (Certified Ethical Hacker) | OSCP (long-term)

CYBERSECURITY PROJECTS

Cloud Infrastructure Security Hardening

- Applied CIS security benchmarks to Azure VM configurations; automated compliance checks using PowerShell DSC and Azure Policy for 50+ training VMs.
- Reviewed and remediated Azure Security Center recommendations including exposed management ports, missing disk encryption, and overprivileged service principals.

Identity Threat Detection – Azure Entra ID

- Built Azure Log Analytics KQL queries to detect suspicious sign-in patterns, bulk MFA resets, and abnormal role assignments in Entra ID.
- Configured Conditional Access policies requiring MFA for all cloud app access; blocked legacy authentication protocols known to bypass MFA.

Web Application Security (Self-Study)

- Practiced ethical exploitation of OWASP Top 10 vulnerabilities in sandboxed environments via PortSwigger Web Security Academy and TryHackMe rooms.
- Studied exploitation techniques for SQL Injection, Stored XSS, CSRF, SSRF, and insecure deserialization with structured write-ups.

ADDITIONAL INFORMATION

Languages: English (Professional), Tamil (Native)

Platforms: TryHackMe (Active), HackTheBox (exploring), PortSwigger Web Security Academy

Career Goal: Transition into penetration testing and red team operations; long-term OSCP certification
